Testimonial to Dave Gill of BPH

I have been working with Dave of BPH for some time now. During this period Dave has installed for me bathrooms, showers, central heating and boilers. He has plumbed in washing machines and maintained and repaired all of the above not to mention providing me with gas safety certificates which are required by law when leasing out properties.

I have worked with many plumbers over the years and expect and demand a high standard of service. I can honestly say that Dave has never let me down either in quality of work, price or time scales.

He is an excellent plumber and as such I would have absolutely no hesitation in recommending his services. As testament to his dedication Dave answered a call the Sunday before Christmas to come and fix my central heating which had broken down. That is the kind of service you can expect from BPH.

Regards
